HOW TO

When the 888tron site opens, select the game and click the [*Wallet*] button. The game wallet menu has the following options:

- 1) Select cryptocurrency (TRX or 888 tokens) to perform deposit/withdrawal operations.
- 2) A deposit option. To deposit funds to the game wallet, enter the amount that you wish to bet with. If you want to deposit the whole amount, click the [*All*] button. Then click the [*Deposit*] button.
- 3) A withdraw option. To transfer funds from the game wallet to the cryptocurrency wallet, select the amount you want to transfer and click the [*Withdraw*] button.

All operations performed with TRX or the 888 token require confirmation (authorisation). Please pay attention to this. The transaction will not be conducted without confirmation (for example due to the breakdown of the Internet Connection, ...)

When the operation confirmation window appears, check the information and click the [*Confirm*] button.

No fees are charged for the transfer of funds between your wallets (cryptocurrency and game wallets). However, it is advisable to always keep a few TRX in the cryptocurrency wallet, which will be needed when freezing/unfreezing tokens.

After confirmation (authorisation) of the transaction, the funds are instantly transferred from the cryptocurrency wallet to the game wallet (and vice versa, when withdrawing).

Your game wallet has been recharged, you can now play!

Remark. Your cryptocurrency wallet and game wallet on the 888tron platform are linked and wholly managed by the player. The player decides the wallet and how much to store in that wallet.
