## TRONLINK (mobile app) /2. How to create a Tronlink crypto wallet

TronLink is the first and most popular TRON wallet. It has the most users and comes in three versions (Chrome Wallet Extension / iOS and Android).

The official website <https://www.tronlink.org/> is in English and Chinese.

Go to <https://www.tronlink.org/>. Click [ *Android* ] or [ *iOS* ] to download the app, and then click [ *Install* ].

Another alternative is to find and install the TronLink Pro app from the Google Play or App Store.

A welcome window opens when the app is launched. Click the [ *Create Account* ] button.

Read the User Privacy Agreement (scroll down to its end) and click [ *Accept* ].

## TRONLINK (mobile app) /2. How to create a Tronlink crypto wallet

Set up a name for your wallet and then click [ *Next Step* ]. Create and enter a strong password (at least 8 characters, including digits and capital letters), and then click [ *Next Step* ]. Re-enter your password and then click [ *Carry out* ].

An alert window then opens, indicating that the system automatically generates a unique mnemonic code (a combination

of 12 words). You need to write down these words and store in a safe place! Click [ *Back up now* ]. A «Please do not take a screenshot» warning pops up. Click [ *Got it* ]. The mnemonic code is preferably photographed using another phone, written down on a piece of paper or stored on a USB

device and stored in a safe place. You will need it later in order to complete the wallet creation procedure.

**Your crypto wallet has been successfully created!**

Your crypto wallet number is a unique combination of 34 characters (similar to a bank account number).

***Important!***

*Store your cryptocurrency wallet data in a safe place for further management of the wallet:*

- *The password that you set when creating the wallet.*
- *The mnemonic code of your wallet (unique combination of 12 words)*
- *Your wallet number (combination of 34 characters).*

## TRONLINK (mobile app) /3. How to start playing on 888tron

Launch the TronLink Pro app and open your cryptocurrency wallet by typing in your password.

Click [ *Discover* ] on the home page.

*Attention.*  
Your cryptocurrency wallet should have TRX cryptocurrency already. How to buy cryptocurrency and recharge your wallet, read «How to buy TRX» instructions.

On the Discover page

- 1) Type 888tron.com into the DAPP search box.
- 2) Click the 888Tron button.

When the 888tron site opens, select the game and click the [ *Wallet* ] button.

The game wallet menu has the following options:

1) Select cryptocurrency (TRX or 888 tokens) to perform deposit/withdrawal operations.

2) A deposit option.

To deposit funds to the game wallet, enter the amount that you wish to deposit.

If you want to deposit the whole amount, click the [ *All* ] button. Then click the [ *Deposit* ] button.

3) A withdraw option.

To transfer funds from the game wallet to the cryptocurrency wallet, select the amount you want to transfer and click the [ *Withdraw* ] button.

An "Authorization Tips" window pops up.

Select [ *SAFE MODE* ] or [ *FAST MODE* ], and then click [ *CONTINUE* ].

**Attention.**

All operations performed with TRX or the 888 token require confirmation (authorisation). Pay attention. The transaction will not be conducted without confirmation (for example, due to the breakdown of the Internet, software or smartphone.)

No fees are charged for the transfer of funds between your wallets (cryptocurrency and game wallets). However, it is advisable to always keep a few TRX in the cryptocurrency wallet, which will be needed when freezing/unfreezing tokens.

To complete the transfer, enter your wallet password and click [ Done ].

After confirmation (authorisation) of the transaction, the funds are instantly transferred from the cryptocurrency wallet to the game wallet (and vice versa, when withdrawing).

**Your game wallet has been recharged, you can now play!**

*Remark:*

*Your cryptocurrency wallet and game wallet on the 888tron platform are linked and managed by you, the player. The player decides how much to store in or withdraw from the wallet.*
