## HOW TO

### Attention.

All operations performed with TRX or the 888 token require confirmation /authorisation. The transaction will not be conducted without confirmation (eg due to the breakdown of the internet connection, software or smartphone.)

No fees are charged for the transfer of funds between your wallets (cryptocurrency and game wallets). However, it is advisable to always keep a few TRX in the cryptocurrency wallet, which will be needed when freezing/unfreezing tokens.

After confirmation (authorisation) of the transaction, the funds are instantly transferred from the cryptocurrency wallet to the game wallet (and vice versa, when withdrawing).

Your game wallet has been recharged, you can now play!

*Remark:*  
Your cryptocurrency wallet and game wallet on the 888tron platform are linked and managed by you, the player. The player decides how much to store in or withdraw from the wallet.
